R: Rank, W: Wins, D: Draws, L: Losses, GS: Goals Scored, GA: Goals Against,
GD: Goal Difference, P: Points

The first horizontal rule shows which teams will automatically play in the Champions League, while the second reveals which team can still qualify. The third marks which teams will play in the UEFA Cup and the fourth lists the “unlucky losers” who are headed down to the relegation for the upcoming season.

In the last column of our chart, we used **sparklines** to visualize each team’s complete record for the 2007/2008 season. A blue upward whisker stands for a win, a red downward whisker for a loss and a black dash in the middle for a draw.

The sparklines were generated using **SparkMaker**, our add-in for Excel, which is available for download at: <http://www.bissantz.com/sparkmaker>
